- HTML
- CSS
- Javascript
- React.js
- Next.js
- Tailwindcss
- Bootstrap
- Git and Github

Language

English (B2)

German (A2)

Russian (fluent)

Georgian (Mother tongue)

I am Mariam Ekizashvili, a 20-year-old Frontend developer with a two-year journey in the field.
My focus on React in the past year reflects my dedication to modern web development. Engaging in various volunteer projects, I've demonstrated effective collaboration, strong coding principles, and adept problem-solving skills. Motivated and adaptable, I stay abreast of tech trends, implementing cutting-edge solutions.
Beyond technical skills, I bring a disciplined, results-driven mindset. This ensures I deliver high-quality solutions within tight timelines, consistently surpassing expectations. Embracing clear communication and a results-oriented approach, I am not just a coder but a proactive problem solver. Eager to contribute precision, efficiency, and innovation to new projects, I am always seeking fresh challenges for continuous growth in the coding realm.

Experience

June 2023 - Present

Youth Society Parzival

Mern stack Development

As the sole developer in the Parzival team, I specialize in developing and maintaining web applications using Next.js, MongoDB, and associated technologies. My role involves designing visually appealing and user-friendly interfaces to elevate the overall user experience. I ensure responsive design implementation and cross-browser compatibility. Collaborating closely with Parzival members, I review project ideas, aligning them with the group's goals, and bring innovative solutions to fruition. My responsibilities extend to continuous site updates, reflecting my commitment to keeping the platform dynamic and optimized.

Jan. 2023 - Present

m2 - Developer Company

Frontend Development

Serving as the exclusive developer at m2, I specialize in the development and maintenance of web applications, centering on Next.js and complementary technologies. I am dedicated to producing visually captivating and user-friendly interfaces that enhance the overall user experience. Implementing responsive design techniques and ensuring compatibility across diverse web browsers are integral aspects of my role. I actively engage with m2 stakeholders to reassess project concepts and objectives, aligning them with the company's vision for impactful outcomes.

Education

Feb. 2023 - Jan. 2024

Davit Kenchadze's Front-End course

I undertook a year-long course that commenced in February 2023 and concluded prematurely in December. The reason for the early completion was my transition to a more advanced group that had started three months earlier. This shift resulted from my proactive approach, completing tasks ahead of schedule, and showcasing advanced skills compared to my peers. Throughout the course, I acquired expertise in Responsive Web Development, Bootstrap, Advanced Javascript, and React.js.

Dec 2022 - Jan 2023

Introduction to Computer Science in JavaScript (Golden)

Jan 2023 - Mar 2023

Responsive Web Design (FreeCodeCamp)

Dec 2023 - Present

The Complete JavaScript Course 2024: From Zero to Expert!
